Jl. Sinar Harapan No.53, Sawah Baru, Kec. Ciputat, Kota Tangerang Selatan, Banten 15413

PROFESSIONAL SUMMARY

Information Technology student at CCIT UI. I have experience building web applications using Next.js, Laravel, and Node.js. I also completed a 6 month internship as an SDET at UOB Indonesia, where I did manual testing, wrote test cases, and used JIRA for bug tracking. Previously, I built a trading website with live chart integration and a Telegram bot for automated trading signals.

WORK EXPERIENCE

Software Development Engineer in Test Intern

PT Bank UOB Indonesia — Jakarta

Janurari 2026 - Juni 2026

- Helped the QA team with manual testing on the UOB TMRW mobile banking app, focusing on login, fund transfer, and transaction history features.
- Created and executed around 20 test cases based on requirements from the business analyst team.
- Logged bugs and issues using JIRA and reported them to developers.
- Performed regression testing on fixed features before production release.
- Learned to use Postman for basic API testing (e.g., checking response from customer profile endpoints).
- Joined daily stand-up meetings to share testing progress and blockers.

Fullstack Developer

PT Midtou Aryacom Futures – Jakarta

September 2025 - Desember 2026

- Developed a community trading website (alpha-gold-society) for trader analysis using Next.js + Tailwind CSS.
- Integrated a live XAU/USD chart and displayed real-time trading signal data.
- Developed an AI Telegram bot (OpenClaw + Python) capable of:
 - Sending automated trading signals (entry, TP, SL, risk/reward)
 - Answering market analysis questions (e.g., "What's the gold analysis today?")
 - Automatic price alert notifications to users
- Deployed the website to Vercel with fast loading performance.
- The website was used by 20+ VIP members within the first 3 months.

TECHNICAL SKILLS

Frontend : Next.js, React, TypeScript, Tailwind CSS

Backend : Laravel, Node.js, Express.js, PHP

Chatbot & AI : Python, OpenClaw, Telegram Bot API

Database : MySQL, MongoDB, Firebase, Supabase

Tools & Deployment : Git, GitHub, Postman, Vercel, Laragon

SOFT SKILLS

Problem Solving and Logical Thinking

Effective Communication (Technical & Non-Technical)

Team Collaboration

Adaptability & Fast Learner

Customer-Oriented Mindset

EDUCATION

Professional Program – Information Technology (Fullstack Developer)

CCIT Faculty of Engineering, University of Indonesia | 2024 – Present

- Fullstack project: Next.js + Laravel/Node.js + MySQL/MongoDB.
- PRACTICE: REST API, JWT auth, Vercel deployment, and Git workflow.
- Case study presentation to lecturers and industry practitioners.

CERTIFICATIONS

Prakerin – PT AKA Solusi Teknologi (No. 24/SERT/AKA-1/VI/2021), 2021

Laravel Web Development Fundamentals – Udemy (2024)

Node.js – REST API Development – Udemy (2024)
